### Job Posting: **Project Superintendent**

DBM Contractors, Inc., a leading Design/Build Specialty Geotechnical Contractor in the western United States, is seeking a Project Superintendent to join our team. The Project Superintendent provides overall field supervision on construction project site and reports directly to the General Superintendent.

- **Primary Skills:** Thorough knowledge of all aspects of geothermal construction (technology, equipment, methods); safety, craft, agreements, jurisdiction, negotiations; engineering, cost control, and schedules required. Excellent communication, organizational and supervisory skills essential. *Clear understanding and thorough knowledge of Company provided Safety manual and Superintendent's Manual are also required.*
- **Salary;** Commensurate with skills and experience including above industry standard benefit package with profit sharing.
- **Education & Experience:** Four year engineering degree or equivalent combinations of technical training and/or related experience. A minimum of eight years construction management and/or project superintendent/foreman experience in specialty geotechnical construction field.
- **Travel:** This position involves travel in DBM coverage areas.
- **Start Date:** ASAP

Besides the primary responsibilities listed above, some of the other duties a Project Superintendent performs include:

1. Supervise total construction effort to ensure projects are constructed in accordance with design, budget, and schedule. Responsibilities include interfacing with client representatives, Architect and Engineer representatives, subcontractors, and other contractors, etc.
2. Plan, coordinate and supervise onsite functions including scheduling, engineering, safety, materials control, including day-to-day coordination with onsite administrative staff in accounting, purchasing, etc.
3. Supervise project foremen, craft employees, and/or subcontractors, as required by the contract.
4. May authorize and/or approve all project personnel transactions, purchase requisitions, field design change requests, etc.
5. Provide technical assistance, i.e., interpretation of drawings, recommending construction methods and equipment, etc. as required.
6. Assist project management in developing and implementing site specific safety plan, project procedures, working documents, standards, etc.
7. Ensure all onsite personnel comply with project procedures, safety program requirements, work rules, etc. Document all violations, notify project management and recommend/implement corrective actions as required.
8. Assume responsibility for productivity of crafts, efficient use of materials and equipment and contractual performance of project.
9. Perform additional assignments per Supervisor's direction.

Please send your resume & cover letter to: Paul Groneck, P.E., VP Operations, DBM Contractors, Inc., 1220 So. 356<sup>th</sup> St., Federal Way, WA 98003 or [paul.groneck@dbmcontractors.com](mailto:paul.groneck@dbmcontractors.com) • No phone calls please
